Solution Brief

AWS Workload Migration (MAP* Migrate)

Seamlessly move your workloads to the cloud

Moving to the cloud, is now a vital component of any transformation strategy. Having a clear path, comprehensive strategy and detailed migration plan are crucial in enabling you to fully embrace the advantages the cloud brings.

With your business objectives at its heart, Insight's AWS Workload Migration Service is a combination of industry-leading best-practices and proven methodology designed to move workloads to the cloud the best way possible and to allow you to maximise the platform's significant benefits.

Benefits

- Service delivered by Insight's certified AWS specialists.
- Supply and implementation of migration tooling.
- Landing Zone – review and update (including network requirements).
- Detailed wave plan and scheduling.
- Implementation of migration phases aligned to best practices.
- Handover and integration into managed services (optional)
- Aligns with the AWS MAP Migration Funding programme (pending registration approval)
- Enable your team to learn alongside cloud experts and transfer valuable skills during the migration process with Insight's AWS migration services.

aws

* The AWS Migration Acceleration Programme (MAP) is a comprehensive and proven cloud migration program based upon AWS's experience migrating thousands of enterprise customers to the cloud.

Business challenge

Migration events are major exercises – **70%** of IT transformation initiatives stalled or were abandoned due to challenges encountered while undertaking transformational projects*.

Whether you're adopting the cloud for the first time or extending your use of it, one thing is certain: the transformation process involves intense amounts of planning, time, and resources, best executed by those with experience. Risks of data corruption or loss, as well as unplanned downtime, are real and need to be effectively managed and mitigated by experts.

Our Solution

Leverage Insight's proven migration experience to seamlessly migrate your workloads to the cloud with our AWS Workload Migration service. This service, following on from our Discover and Build Services, provides accelerated, secure, and seamless migration of workloads to AWS Cloud, and it is aligned with your business objectives. Our AWS Migration competency assures our clients that we possess the necessary skills and abilities to migrate their IT workloads to AWS Cloud in an accelerated and seamless manner using standardised methodologies and alignment to industry best practices. Our tailored solution reduces the risk and cost of migration, while our team of experts provides proven methodology and expert guidance throughout the migration process.

Our service includes:

- Workshop and planning session/s- including workload review and "handover" from Assess and Mobilise phases.
- Migration tooling and implementation.
- Landing zone review and recommendations including networking prerequisites.
- Target environment updates where required.

- Wave planning
- Migration and scheduled cutover process.
- Post-migration activities including operational and documentation updates, lessons learned, future state, and modernisation opportunities.
- Optional handover to managed services

Is this solution right for you?

We have developed an expansive range of services to help you along the entire cloud journey to achieve your business objectives with AWS. By taking a comprehensive approach and using our deep, broad expertise, our services portfolio guides you towards a successful AWS adoption strategy, resulting in your IT team spending less time firefighting and more time creating business value.

Discover **&** Plan

We'll gain a full picture of your current and future requirements, exploring the right approach, and then plan how to realise the value through cost-effective solutions.

Build **&** Integrate

We can accelerate the deployment of your chosen solution, using our deep expertise and resources to seamlessly install and integrate the right technology.

Run **&** Innovate

Depending on your requirements, we can then help you optimise your AWS technology by supporting or managing it on your behalf.
